

# Model DF234 Control Valves

## Technical Sales Bulletin

**Figure 1** DF234 Control Valve

The Dyna-Flo Model DF234 control valve is primarily designed for on/off control of a variety of gases or fluids. These tough valves are manufactured for use as dump valves and feature a low profile and lightweight design that fits into tight locations and makes for easier handling. The DF234 is well suited for many other high pressure gas or fluid applications up to 2,250 Psig (15,513 kPag). The DF234 is available in 1 inch and 2 inch sizes, either in a globe or angle style valve body with threaded NPT or flanged connections.

The Dyna-Flo Model DF234 control valve is manufactured to a high level of quality specifications to ensure superior performance and customer satisfaction.

### Features

#### **NACE Service Ready**

Standard construction for the DF234 control valve features NACE trim. The valve bonnet and body also conform to NACE MR0175 (National Association of Corrosion Engineers) recommendations.

#### **ASME Class 900/1500**

The DF234 is designed and rated for ASME B16.34 Class 150 - 1500 service.

#### **Live Loaded Packing**

Packing for the DF234 control valve is designed to provide a quality stem seal and to prevent the loss of hazardous gases or fluids. The live loaded feature provides for reduced maintenance and positive sealing in temperature and pressure cycling conditions.

#### **Field-Reversible Actuator**

Field conversion of the DF234 actuator is designed to be quick and easy. Switch the DF234 from a spring-close to spring-open actuator without any additional parts.

#### **Easily Maintained**

The hammer union body to bonnet connection allows for easy removal of the bonnet/actuator for access to trim and packing. Trim removal requires no special tools and is quick and simple. The two piece cage seat allows replacement of the seat ring while using the existing cage making port changes and maintenance more economical.

#### **Low Temperature Materials**

The DF234 valve and actuator are constructed with materials that are capable of functioning in temperatures of -40°C.

#### **Open Yoke**

The DF234 features an open yoke that allows for the mounting of a feedback arm to facilitate positioners and indicators.

#### **Versatile Trim Material Options**

Plug and seat ring materials are available in S17400 DH1150 and S30300 / Tungsten Carbide.

## Technical Sales Bulletin

### SPECIFICATIONS

#### Port Diameter

1/4", 3/8", 1/2", 3/4", and 1"

Refer to Table 1 & 2 for details and Port Diameters.

#### Sizes and Connection Styles

Size: 1 & 2 inch

Rating: ASME 150 / 300 / 600 / 900 / 1500

FNPT: 2,250 Psi (15,513 kPa) CWP

Connections: FNPT / RF / RTJ

Refer to Table 1, 2, & 3 for details and Port Diameters.

#### Standard Shut-off Classification

ANSI Class IV ASME / FCI 70-2

Optional Soft Seat ASME Class VI ASME / FCI 70-2

#### Dimensions

Refer to Table 5 (Page 6) & Figures 4 - 5 (Page 7)

#### Flow Characteristics

Quick Opening

#### Flow Direction

Up or down (Refer to Table 2)

#### Maximum Travel

3/8 inch (10 mm)

#### Material Temperature Capabilities

##### Body Assembly

-46 to 150°C (-50 to 300°F)

##### Actuator Assembly

-40 to 82°C (-40 to 180°F)

#### Body Style

Available in Globe and Angle style.

#### Bonnet/Body Connection

Threaded Hammer Nut.

#### Actuator Configuration

The DF234 utilizes a on/off style spring and diaphragm actuator. Fail action is field-reversible.

#### Maximum Actuator Casing Pressure

50 Psig (345 kPag)

#### Effective Actuator Diaphragm Area

33 inches<sup>2</sup> (213 cm<sup>2</sup>)

#### Actuator Pressure Connections

NPS 1/4 inch NPT

For more information and other options contact your Dyna-Flo sales office.

Maximum Pressures and Temperatures <sup>1</sup>		
Valve Size	200°F (93°C)	300°F (150°C)
NPS 1 inch FNPT	2,250 Psig (15,513 kPag)	2,185 Psig (15,044 kPag)
NPS 1-2 inch Flanged Class 600	1,500 Psig (10,342 kPag)	1,454 Psig (10,024 kPag)
NPS 1-2 inch Flanged Class 900	2,250 Psig (15,513 kPag)	2,185 Psig (15,650 kPag)
NPS 2 inch Flanged Class 900/1500	3,750 Psig (25,855 kPag)	3,640 Psig (25,097 kPag)

<sup>1</sup> - The limitations shown are as per ASME B16.34. Refer to the pressure temperature ratings in this standard for all other flange ratings. Do not exceed these ratings.
